I thought about reading a book
and then I thought
Why?

I thought about running a couple
of miles
and I thought
Why?

I listen to music
because it carries me along

but everything else
just
exists around me

I am not apathetic

I care about some things

but only as an observer
and not as an emotional
life and death
participant

Everything is
as it should be

Dr John WorldPeace JD

I sit here in my chair

the center of my Universe

I stare out
watching

thinking

I am at the controls

I may move, I may not

I will do as I please

When this body
dies

I will still
sit in this chair

and when this chair is gone

I will sit
in its memory

and stare out

thinking

840107

I can not believe that
 when my body dies
 that anything will be
 different

How can I die

When I am

My body is just like
 a machine

 Its biological
 biodegradable
 as is a machine

 I give its senses
 meaning

A body without a soul
 cannot feel

It is my being
 which anticipates feelings

When this body dies
 I will still be here

 I will not cease
 with it

840107

Dr John WorldPeace JD

There is not good or evil
except as we define it

There is only existence

We live
we exist
we do as we please

We can do nothing
which does not effect
the order of the
universe

As a pebble ripples
the ocean

So our thoughts
ripple the Universe

True good
must be the non interference
with others

Therefore we can never
be good

We can't think
without disturbing
something

840107

If someone does not believe
that they are evil

Then how can they be evil

How can we condemn someone who is
what he is

We cannot

We are lights in the Universe
and we each have a right to be
and a right to live
our own reality

After an eon or two or three
we will come to a philosophy
that we can all live by

Since we are already on that infinite path
we are now what we should be

We are now what we
should

We are what we are

Tomorrow
we will be what we were then

We are what we should be

We should
find peace in that

870107

Dr John WorldPeace JD

Life is living
and living is growing

We should look at all living
not as good or bad

but only as things are

Does it really matter what philosophy
we have
if there is truly only
one reality

That reality is the one that
we will all eventually acknowledge

If we don't
then there is not one reality

But only the reality
of one

840107

Dr John WorldPeace JD

If there is Karma
and we live some of it
in these mortal shells
on earth

Is it possible there are
other planets
to live out different Karma

Does the Universe
place us in these strange environments

Or do we seek them out
for new experiences

All earthly philosophies
limit their scope to this earth
and this physical Universe

These philosophies
just won't fit in the realm
of infinite variety

Variety where every concept
exists

We create our own reality
and then live it

Either these realities
are the truth

Or there are many realities
many truths

Dr John WorldPeace JD

Reality is hidden from us because
it is so simple

We can only know
after eons of seeking

840115

It seems that whatever the truth of
the Universe
the earth must be a model

We can generalize
from what we observe on earth

But we cannot forget that we are only a permutation
of the truth

As everything is a model for a
larger truth
There are many forms of
that truth

We have an infinite number of combinations
of but one principle

One day we will know
that principle
and then we will
understand
the why of all
the permutations

840115

The purpose of our lives here on earth
cannot be to deny ourselves
all the pleasures of this world

We may not want to over indulge
in any particular pleasure

But there is no reason
not to participate

We are animals
and part of this life
is to live as animals

We should not try to live
an astral experience on earth

We should live an earthly experience
on earth
and a spiritual experience
in our astral state

Those what would deny us earthly pleasures
while we are on earth
would most likely deny us
astral experiences
when we are in that form

We must experience in order to grow

We cannot put pleasure on any plane
in its perspective unless we
experience it

Dr John WorldPeace JD

We cannot evaluate from
a far

If we could

then incarnating would be
pointless

840115

Dr John WorldPeace JD

What is the meaning of life

Growth

We exist to grow and to experience

To be bad and good

We can be of no use to ourselves
or others if we try to advise
about things we have never
experienced

840115

Dr John WorldPeace JD

The way to overcome our desires
is to experience them to boredom

not to deny them

By denying them we will just increase
their intensity

By experiencing we become
bored and all things
will be put
into proper perspective

840115

If we were all extremely devote

We would all eventually achieve
a level of sameness

The plan of the Universe is
not uniformity but variety

Why do our religions
push us toward sameness

840115

Dr John WorldPeace JD

How interesting it is to contemplate sin

In reality we cannot exist without sinning
against something

To move or think blocks out
something else's
right to unabridged freedom

The question is only where to draw the line

Thousands of years have we drawn
the line and moved it
by force of arms
or will

Yes, there is sin
but its not Universally punishable

We all crowd on the elevators of life

Each in our own space
breathing each other's air

We exist
side by side
each doing his best

How can we punish each other for this

I don't know
but we try

840116

Dr John WorldPeace JD

How is it that we
kill animals to eat
without some remorse

We kill plants
with no thought
of guilt

Why is an animal
more sacred
than greenery

We are animals
that's why

840116

Dr John WorldPeace JD

Lives of great men
 come and go so quickly
 that they seem
 almost a dream

They are firecrackers
 in the scope of earth time

One quick pop

 A flash of light

 and they
 have come

 and gone

The rest of us
 sit in the
 center of ur
 own little pop

 wondering

840117

What a task it is to lead a religion
to define God's laws for all

Moses only had ten rules

That was the basic foundation

We have seen what several thousands
of years has done with the
millions of questions regarding
the meaning of those
Ten ruled

Add another couple of millennium
and we will have what
we had before Moses

Morality in each man's heart

I'm glad I don't have to interpret

My soul could not
cleanse itself of all
the injustice

840121

How strange it is to see
animals kill and devour
each other

Is life so cheap
that we are only
food for each
other

We are given bodies
that are to take us
from here to there
on a journey of
growth

And yet these bodies
not only are subject
to inevitable
deterioration

They are also subject
to being confiscated
for food

Is this the lesson
of morality

Physical morality
is finite

840521

I saw real spaceships
on Saturday
and they had a
strange reality
for me

Coffins of metal and some glass
packed with lights and
switches and painted grey

How small they are

How drab

But yet
they are the tip
of a spear
piercing the future

I don't know
what I expected

The beauty and fiction
of cinema
I guess

Then
I thought
of nuclear missile

And have since
tried to
bury the entire
experience

840521

Dr John WorldPeace JD

High on the universal place
I sit and contemplate
all that has been

al that is and will be

I think of the past

I create the future
and the future
creates itself

Away I go
one conscious thought
at a time

but seldom
in logical order

I race through
the pockets and cracks, crevices and caves
remembering
dreaming
contemplating
creating

I leave you a few words
from these travels

840115

Dr John WorldPeace JD

I bring you a world of everything

and because I say it is

It is

Go with it

its only a window

Go inside

Depart from

where I was

and marvel for a moment

at your own

thoughts

Know one thing

There are no limitations

Everything is

840815

Dr John WorldPeace JD

Red hard feathers

beat softly on the sky

and create a billion

cyclones of displaced air

One beat of only one feather

sends

vibrations throughout

the infinite void

An infinite wave

of tiny disruption

Radiating forever

840815

Nothing

no light
no dark

the absence of light and dark

What is it?

Is it nothing?

No
because nothing is something

So we will use the word

AZ

AZ

is the exact
equilibrium
between
something and nothing

light and dark
good and bad
infinity and infinity

This is where?

Nowhere

where it begins
NO

where it ends

Think anything
and between the two
will be
AZ

But remember

AZ is only two letters
to make a sound
to define what
isn't and is

There is no AZ
but I give it a
name
anyway

So what is this we experience
it is AZ
everything
and nothing

A body
a tissue
a cell
a molecule
an atom
a proton
a quark
AZ ...

Dr John WorldPeace JD

A universe of non-existent marbles

black and white

big and small

bright and dull

hard and soft

smooth and rough

heavy and light

cold hot

Pay attention !!!

All this at once !

everything and nothing

at once

one and infinite

at once

stable and unstable

at once

These are the universal

building blocks

AZ

If All That Is

is at once

in equilibrium

of everything

and nothing

AZ

How is it that we are
some but not all

Or better

why do we
perceive some
but not all

We know
disequilibrium

Why ?

We know parts
and whole part

Why ?

810825

Red flaming hair
 burns passionate love
 in silky strands
 of Satan
 threads

Sky blue eyes
 fathom the Universe
 in my soul
 and send love
 deep into my heart

I love you
 woman of red hair

I love your simple clothes of cotton

 I love to feel it against
 your supple skin

You are a dream
 and I look closely
 to see if you are real

I find out you are
 as my essence
 burst like an exploding
 galaxy
